WPA Epidemiology and Public Health 2016 Meeting

Dear Ms Tsatsou,

I wish to express my deepest gratitude for the excellent performance of Erasmus A.E. as our PCO during the “WPA Epidemiology and Public Health 2016 Meeting” which took place in at the Institute of Psychiatric Phenomics and Genomics (IPPG) at the Medical Center of the University of Munich between March 29th and April 1st, 2016.

Your company contributed decisively to the success of this congress event. Based on the most favorable comments of our distinguished speakers as well as those of all congress participants, the organizational level of the Congress was very high indeed and the concerted actions of the ERASMUS team towards this accomplishment was particularly appreciated. For all services provided, from project management including budgeting, financial reconciliation, scientific coordination including speaker relations and abstracts, registration, meeting materials including the printed final program, hotel arrangements, and onsite staffing, the members of our local and international organizing committees evaluated ERASMUS as an outstanding PCO due to its perfect infrastructure and the excellent quality of services provided to all congress participants.

I can recommend Erasmus as a trusted, efficient, and enthusiastic partner, with a strong commitment to the client. I certainly believe that we will have more opportunities to collaborate productively in the future.

Sincerely,

Thomas G. Schulze, M.D.

Professor and Director, Institute of Psychiatric Phenomics and Genomics (IPPG)
Medical Center of the University of Munich
